

Ligo - Cole demo walkthrough

You're Cole Brennan, admin of Georgetown Program Board (GPB).

Live: ligo-cole-demo.vercel.app

No login. No profile switcher. Open the link and click through in order below.

1. First thing: Pass / I'm In

When it opens, invite cards stack on top of Events. This is the fast RSVP for private / invite-only events.

I'm In

You're going. Saves your RSVP. The event shows up in My Events.

Pass

You're out. Card goes away.

Tap the card/flyer first if you want the full event page before deciding. Clear 1-2 cards so you feel it, then you'll hit the main tabs.

2. The four tabs

Explore · My Events · Clubs · Manage

Explore

Campus feed - public Georgetown events. "What's happening on campus."

- Scroll This Week and other sections
 - Open an event, read flyer/details
 - RSVP from the bottom of the event page if you want
- Members-only club events do NOT show here.

My Events

Your hub - everything upcoming for you:

- Events you said I'm In / Going / Maybe to
- Invites you haven't answered yet
- Stuff you're hosting as GPB admin

After you I'm In on an invite, flip here and find it.

Clubs

Org home for groups you're in - not the whole campus. Tap Georgetown Program Board.

After a short welcome:

- Chat - whole-club chat (ops/banter). Not the same as an event group chat.
- Events - members-only GPB events + campus ones GPB also hosts
- People - roster

You're an admin, so Open event ops jumps into organizer tools from here too.

Try: Clubs -> GPB -> Events -> open a members-only event -> Event group chat (thread for THAT event).

Manage

Admin ops for GPB - the organizer product. Tap Manage -> "Running the board" splash -> Event ops.

- Overview - next event + quick actions
- Events - internal (members-only) vs campus/public
- Members - On Ligo / Invited / Not on Ligo
- Invite members - get people ONTO Ligo, then into the org (not a party guest list)
- Create / + Create - publish a new event

3. Suggested 3-minute path

- Pass / I'm In - I'm In on one invite so it hits My Events
- Explore - open a campus event, look around
- My Events - confirm your I'm In is there
- Clubs -> GPB - peek Chat / Events / People (optional: Open event ops)
- Manage -> Invite members once
- Create -> Autofill Kickoff -> Members Only -> Publish -> Group chat + Send update
- Create -> Autofill Breakfast -> Georgetown -> Publish -> check Explore

The point

Kickoff (members-only) stays inside the club.

Breakfast (campus) hits Explore.

Same admin tool, two distribution modes.

4. Quick map

Campus / Breakfast -> Explore: yes | My Events: if you RSVP | Clubs: Also hosting | Manage: public list

Members-only / Kickoff -> Explore: no | My Events: yes | Clubs: For members | Manage: internal

If something looks weird: hard-refresh. Old RSVPs can stick in the browser.
