

Ligo - Cole demo

You're Cole, running Georgetown Program Board. No login. No switching accounts. Just click around.

ligo-cole-demo.vercel.app

What to do (like 2 minutes)

1. Hit Manage at the top

You're in GPB ops - events, members, invites.

2. Tap Invite members

This is "get people on Ligo," not a party guest list.

3. + Create -> Autofill Kickoff -> publish as Members Only

Then open Group chat on that event. It's for this event - not the whole club GroupMe.

4. Create again -> Autofill Breakfast -> publish to Georgetown

Flip to Explore - Breakfast should be on the campus feed.

Kickoff stays inside the club. Breakfast goes campus-wide. That's the whole point.

Other tabs (optional)

Explore - what's public on campus

My Events - your stuff

Clubs -> GPB -> Chat / Events / People if you wanna poke around

If something looks weird

Hard-refresh the page. Old clicks sometimes stick in the browser.
