

# Ligo - Cole demo

You're Cole. You run Georgetown Program Board. Open the link and click around - no login, nothing to switch.

[ligo-cole-demo.vercel.app](https://ligo-cole-demo.vercel.app)

## When you first open it: Pass / I'm In

You'll get invite cards right away. This is the fast RSVP - for private / invite-only stuff that needs a yes or no.

### I'm In

You're going. It saves your RSVP and the event shows up in My Events.

### Pass

You're out. Done. Next card.

Tap the card itself if you want the full event page before you decide.

## Explore

Campus feed - public Georgetown events. Scroll, open anything, RSVP from the event page. This is "what's happening on campus."

## My Events

Your hub. Everything upcoming for you - stuff you're going to, hosting, or still deciding on. If you I'm In or Pass somewhere else, it shows up here.

## Clubs

If you're in an org (you're in GPB), this is the club home: Chat, Events, and People - just for that group. Because you're an admin, you can also jump into organizer tools from here (Open event ops).

## Manage

Your admin ops for GPB. Create events, invite people onto Ligo (not a guest list), see members, run the event dashboard.

Quick loop to try:

1. Manage -> Invite members (feel that flow)
2. + Create -> Autofill Kickoff -> Members Only -> publish
3. + Create -> Autofill Breakfast -> Georgetown -> publish
4. Check Explore for Breakfast

**Kickoff stays in the club. Breakfast goes campus-wide. That's the idea.**
